IRRIGATED DRY BEAN QUESTIONNAIRE

There is a strong correlation between successful dry bean production, grower experience and management practices. In order for Crop Insurance to provide a fair and effective program for irrigated dry beans, a management plan must be submitted.

Forward your questionnaire by telephone, fax, mail or visit your customer service office. You can print off a copy of the questionnaire from our website at www.saskcropinsurance.com. All questionnaires must be returned by April 30.

Growing Experience

1. How many years of growing experience do you have with dry beans?
2. If you have growing experience, how many acres did you seed and what have your yields been?

Year _____	Year _____	Year _____
Acres _____	Acres _____	Acres _____
Variety _____	Variety _____	Variety _____
Yield/Ac _____	Yield/Ac _____	Yield/Ac _____

Management Strategy

Field Selection

The following questions deal with your field selection for your upcoming dry bean crop. These questions address possible disease issues related to rotation, weed problems (dry beans are extremely poor competitors), chemical residues, and fertility issues because of the bean plant's limited ability to fix nitrogen.

1. Please indicate the legal land description(s) and the acres you plan to seed of dry beans.
2. Are there areas in the field(s) you have selected 1) prone to flooding or 2) saline? Please circle the conditions that apply.
3. What is the cropping history (the last 4 years) on the field(s) you have selected to grow dry beans?

4. Are you prepared to control sclerotinia in the field(s) selected? _____
5. What herbicides did you use on this field last year? _____
6. Have you used Assert, Muster, Ally or Accord, Unity, Triton, Atrazine or Tordon in the last 2 years on this field? _____
7. What are the dominant weeds present in this field, most importantly broadleaf weeds? _____

Contract Number	Crop Year	Home RM	Date	Contract Name

8. Can these weeds be controlled in a dry bean crop? _____
9. What variety do you intend to seed? _____
10. Are you using certified seed? _____
If not, has a germination test been done by a lab on the seed you will be using? _____
11. Is your seed free of bacteria blight? _____ Are you prepared to control this disease in your crop? _____
12. Are you planning to inoculate? _____
13. Are you planning to fertilize? _____ If so, what amount of each macronutrient?
N _____ P _____ K _____ S _____
14. What date and soil temperature would you usually plan to seed your beans? _____
15. Are you row cropping or solid seeding? _____
16. What seeding implement are you using? _____
17. If using an air drill/seeder, are you doing anything to minimize seed damage (soaking _____ seed, reduced air flow, manifold liner, etc.)?
18. When are you planning to roll your bean field? _____
19. Are you planning on swathing or straight cutting? _____
20. If straight cutting, do you have specialized equipment to reduce harvest losses? _____

I certify the above to be true and correct and is subject to the Crop Insurance Contract of Insurance. I am aware that to make a false statement is an offence.
